Career Objective

To pursue a career in Mobile App Development and Cyber Security, utilizing my skills in modern app technologies, ethical hacking, and system protection. I aim to work in a growth-oriented environment where I can develop secure applications, strengthen digital security, and continuously improve my technical expertise.

Skills Summary

- **Technical Skills:** C, C++, Java, Python, HTML, CSS, JavaScript, MySQL, React Native, React.js, Node.js, Networking Fundamental, Operating System Knowledge, Incident Response, Risk and Vulnerability Management
- **Soft Skills:** Communication Skills, Teamwork/Collaboration, Time Management, Decision Making

Experience

IBM Skills Build – AICTE Virtual Internship Ahmedabad, Gujarat
AI Strategy & Business Intelligence Intern Mar 2026 – Apr 2026

- Successfully completed a 6-week industry-focused internship on AI Strategy, Business Intelligence, and Generative AI technologies.
- Built and worked on AI-powered applications using tools like IBM Watsonx, IBM Granite Models, Python, Google Colab, and Relay.

Education

Shreyarth University
IMScin CA &IT Ahmedabad,Gujarat
Graduate Completed (Undergraduate Phase) 2026
Master's Phase In Progress 2026 – Present
Current CGPA: 6.24

Projects

Attendance & Review System
TechStack: PHP, MySQL, HTML/CSS, JavaScript

- **Attendance Management:** Implemented a basic attendance module allowing users (students/employees) to mark daily attendance and view their attendance history.
- **Review/Feedback System:** Added a simple review section where users can submit feedback, and admins can view, manage, or delete reviews.
- **User Authentication:** Created a basic login system for Admin and User roles using PHP sessions for secure access control.

AI Health Chatbot
TechStack: React, Gemini Api, HTML/CSS, TypeScript

- **AI Integration & Prompt Engineering:** Integrated the Google Gemini API to process natural language health queries, engineering strict system prompts to enforce mandatory medical disclaimers and block diagnostic outputs.
- **Emergency Response Protocol:** Programmed algorithmic safety guardrails to detect high-risk symptom keywords (e.g., chest pain) and automatically redirect users to emergency medical services.Programmed strict AI safety guardrails via prompt engineering, ensuring the model issues medical disclaimers and redirects life-threatening queries to emergency services.
